Premium P90

FEATURES	BENEFITS
Calm Situation	Provides listening comfort and clarity in quiet, one on one conversation.
Speech in Noise	Adapts and reduces noise from behind in real time and applies and optimizes the signal-to-noise ratio (SNR) in noisy environments.
Speech in Loud Noise	Automatically helps you focus on a single speaker directly in front of you in an extremely noisy crowd, for eg. a party or restaurant.
Speech in Car	Reduces car and road noise to make listening in the car more enjoyable.
Comfort in Noise	For listening comfort in loud situations when no speech is present.
Comfort in Echo	Reduces disturbing echo while letting you hear and understand speech naturally.
Music	Offers a full and rich listening experience so you can enjoy your favourite music again.
Direct Connectivity	Automatic streaming to both ears from any bluetooth enabled device (phone calls, music, videos, e-books, podcasts and much more). Distinguishes between streamed speech and music signals, and automatically adjusts for an optimized sound quality.
Speech in 360°	Once activated, this automatically tracks and focuses on the dominant speaker, when you cannot face them, for e.g. driving with passengers behind or beside you.
EchoBlock	Identifies signals blurred by echo/reverberations and removes them, providing you with clearer hearing.
SoundRelax	Cushions sudden loud or unpleasant impulse sounds such as clanging dishes.
WindBlock	Suppresses wind noise so you can enjoy spending time outdoors.
WhistleBlock 20 channels	Elimination of annoying and embarrassing whistling from the hearing aids before it becomes audible to you or people around you.
NoiseBlock 20 channels	Automatically reduces annoying background noise like engines or fans without reducing the voices you want to hear.
QuickSync	Control both your instruments (program and/or volume changes) with one simple touch.
UltraZoom Premium 33 channel adaptive directional mic	In noisy situations this feature zooms in on voices that are facing you. Noise from the side and back is reduced, for e.g. home activities or in meetings.
Speech in Loud Noise	Automatically helps you focus on a single speaker directly in front of you in an extremely noisy crowd, for eg. a party or restaurant.
SoundRecover2	Makes high pitched sounds easier to hear, for e.g. women's voices.
Tinnitus Balance	Every Paradise model includes a "built-in" feature designed to reduce the annoyance of your tinnitus, especially in quiet environments.
Dynamic Noise Cancellation	Automatically reduces background noise around you so that it is easier to hear the speech in front of you.
Speech Enhancer	Designed to boost soft speech and speech at a distance in quiet situations.
Tap Control (Audéo P-R & Audéo P-RT only)	Gives you easy access to voice assistant applications. This feature also allows you to answer and end phone calls from your smartphone and pause and resume streaming from your connected devices.
Motion Sensor Hearing (Audéo P-R & Audéo P-RT only)	Detects whether you are standing or moving and adjusts the microphones to optimize your ability to hear speech.
